

## Herausragende Eigenschaften:

- Gleichmäßige Ausleuchtung
- Sehr lange Lebensdauer
- M8 Steckeranschluss mit 250mm Kabel
- Betriebsspannung 24V DC

## In folgenden Varianten erhältlich:

- Infrarot (clear/diffuse)
- Rot (clear/diffuse)
- Weiß (clear/diffuse/polarized)

| Typen    |                                                                   |            |          |                                                                                                                                                                                                                                                                                                                                                                                                                |     |          |            |   |   |       |   |    |       |   |   |      |   |    |       |
