

## Simple, safe, automated container inspection with AIT EasyToteBin Inspector

With the Cognex In-Sight 2800 camera and EdgeLearning technology, the AIT EasyToteBin Inspector increases efficiency and safety in container inspection.

With the AIT EasyToteBin Inspector, you can:

- Perform automated 100% inspection of containers without manual checks or physical contact
- Reliably detect even the smallest residues and contamination, such as streaks, dirt, liquids, or wear damage
- Sort clean and empty containers from contaminated or filled ones
- Reject defective or worn containers or route them for cleaning

In addition, container inspection can be linked to barcode readers and corresponding container IDs, enabling full traceability of OK and NOK containers.

### Benefits

- Real-time analysis of container contents
- Automated container inspection
- No manual visual inspection required
- No direct contact with contaminated containers
- Saves time and reduces costs
